SALEGRABBER SETUP.

- SaleGrabber Mail + Receipts -

Select **Open**

Email **Settings**

So that your client does not receive too many emails we recommend that you choose "ON" for Default Email if your average client attendance is less than once a week and "OFF" for Default Email if your average client attendance is more than once a week.

note: Even if the default email option is set to "ON" the clerk can choose to "untick" the auto- sending of an email @ the POS during the sales transaction.

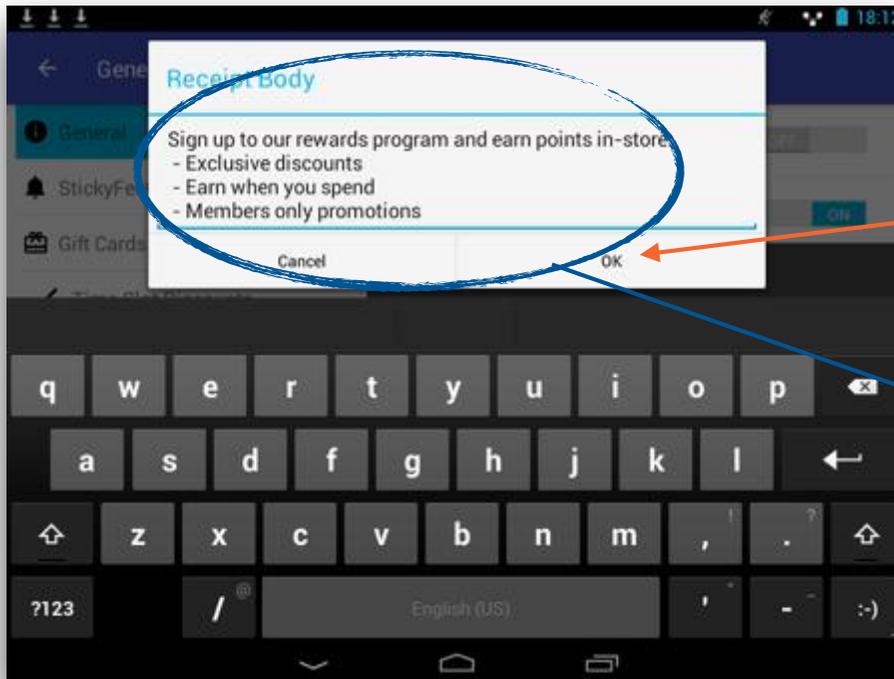

Receipt **Text**

Choose "ON" if you wish to have text printed when no Loyalty card is presented.

SALEGRABBER SETUP.

- SaleGrabber Receipt Setup-

Receipt Text

Tap the POS screen to bring up the Receipt Title text.
Adjust the text to what you want to say and press **OK**

By scrolling down you can select and adjust all of the variable text.

note: If your company has not chosen the option to give your loyalty clients the ability to claim their points post-transaction then you do not require an IQ Gecko web address or QR-code here.

SALEGRABBER SETUP.

- Credentials IDs + Codes + Keys -

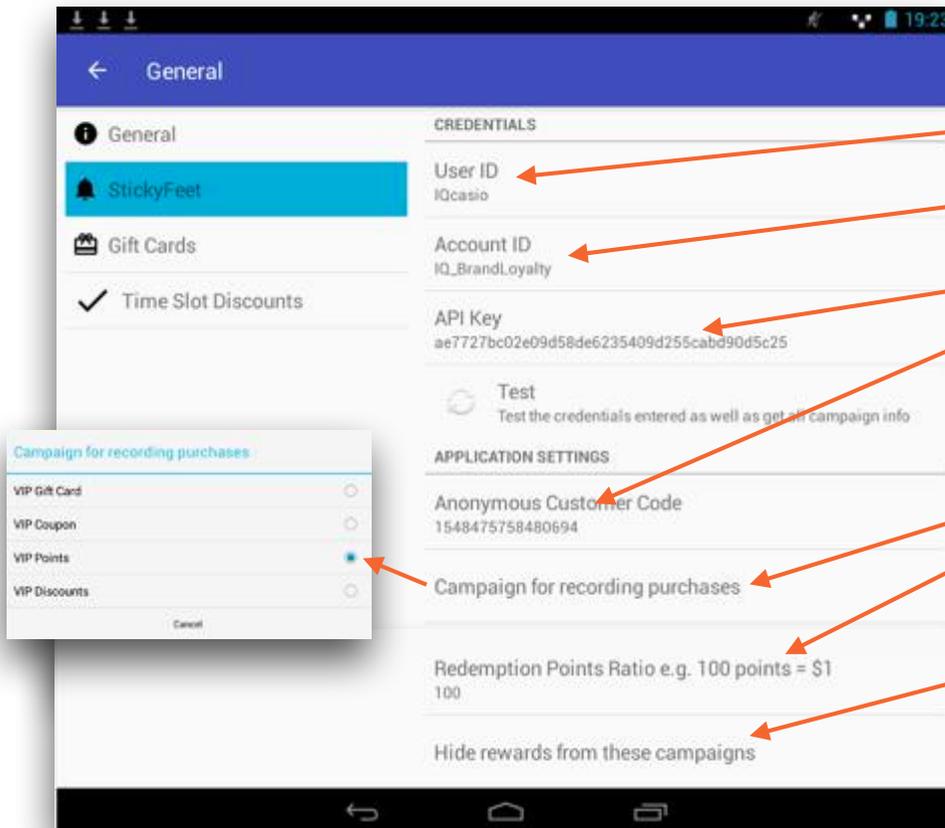

HOW TO FIND:

- Credentials IDs + Codes + Keys -

Enter in the relevant **IDs**, **Codes** and **Keys** supplied to you by IQ Gecko.

These credential details are required for overwriting the credentials of the default SaleGrabber APK.

User ID: The ID name of the POS as created in Authorised Users permissions.

Account ID: This is the OWNER ID from the account information setup.

API Key: This is the Security Token of the above USER ID.

Anonymous Customer Code: This is the StickyFeet platform's number of the Anonymous Customer created.

note: If your company has not chosen the option to give your loyalty clients the ability to claim their points post-transaction then you do not require an Anonymous Customer Code or Campaign ID.

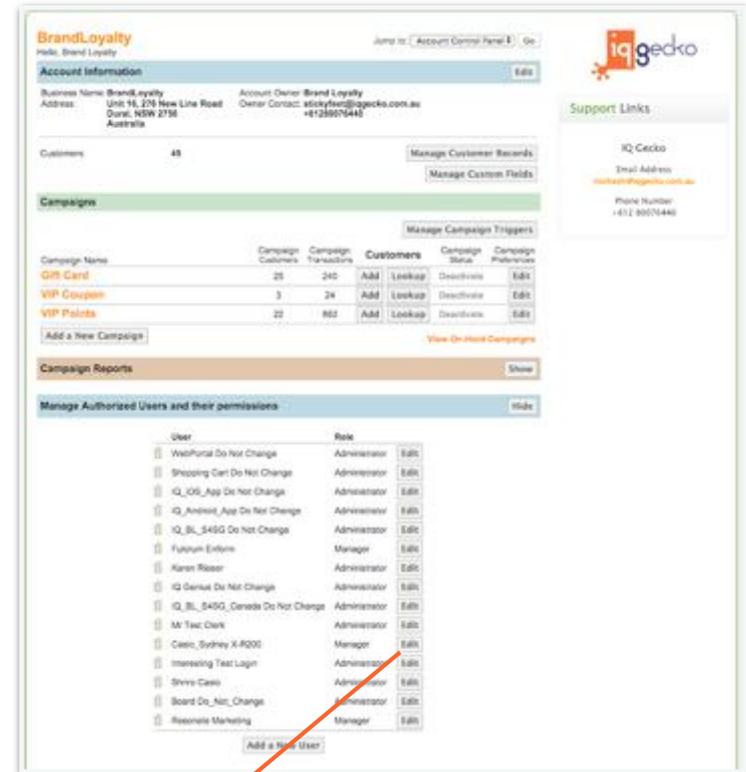

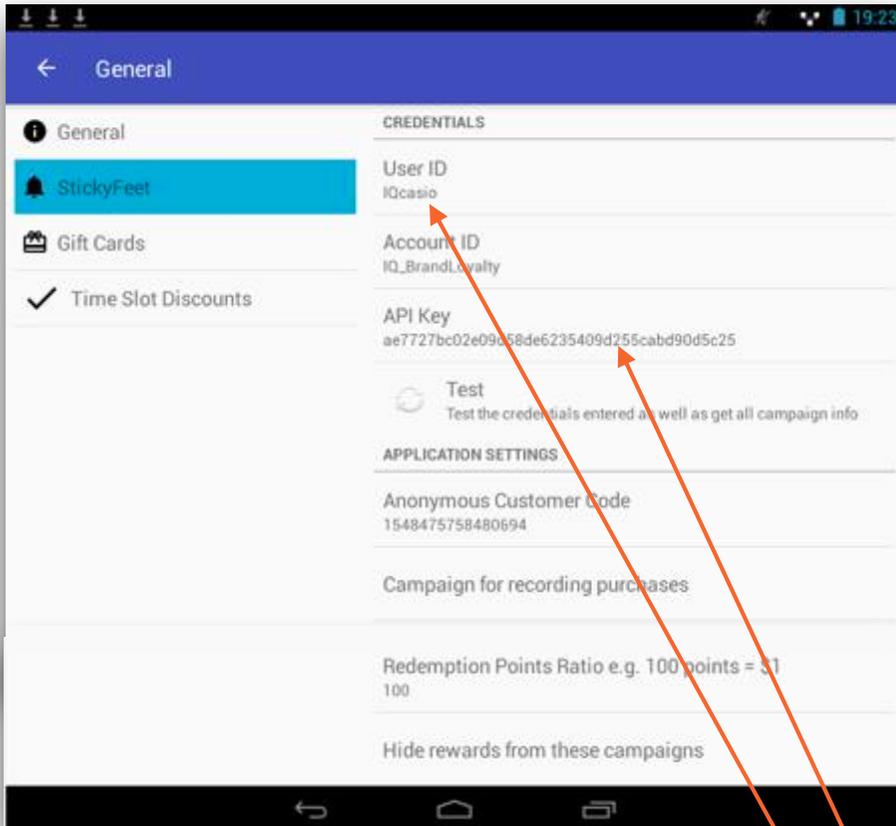

Campaign: This is the your primary Loyalty Campaign.

Redemption Points Ratio: This is the value rate of Points being redeemed - defaulted at 100points equalling \$1 which is a 1¢ per point ratio.

Hide rewards: This is a way to have a campaign running in the background (giving points, capturing data, etc) but do not want the campaign displayed on the POS.

Values can be either

1. A list of days, that they're applied on
2. A single day that it can be applied on
3. A single date that it can be applied on
4. A date range

1. Days are specified by starting with "days" then a list of days, from: "Mon", "Tue", "Wed", "Thu", "Fri", "Sat", "Sun"
2. Same as 1, however ensure you're using a comma to separate them
3. Start with "date:" and enter the date you want as dd/mm/yyyy
4. Start with "dateRange:" and enter the first date to start from, followed by a "-" (hyphen) and then the second that the price ends. These dates are inclusive of the discount.

Examples:

days:Mon,Tue,Wed

days:Fri

date:14/02/2018

dateRange:24/12/2018-26/12/2018

Sample CSV

- All fields double quoted, so we can read them in properly, plus Excel will handle them better
- Use a comma as a separator

All PLUs that are affected by the Happy Hour (and Member) discounts will need to be in a CSV file format and loaded into the POS for our SaleGrabber software to access.

We are looking @ two upload options

1. USB (media key)
2. URL (hosted on a web page)

We will create a selector where you can choose the data destination and a "sync" button.

This does mean that any/all member Happy Hour updates will have to be "re-synced" before the changes will take affect.

Non-registered cards = No Customer Found

If you do not wish to register the card @ POS now then select Cancel

CASIO WORKFLOW.

- Unregistered Card Transaction -

As the customer is not registered select **Cancel**

The screenshot shows the SaleGrabber POS interface. At the top, it displays 'SYSTEM B-ON Payment' and the date '7/09/2018 20:27'. Below this, there are sections for 'Customer Details' and 'Available Rewards'. The 'Available Rewards' section states 'This customer has no rewards available'. There is a checkbox for 'Send email summary to customer?' and a 'SEARCH ANOTHER' button. The 'Current Transaction' section shows a 'Pay Amount' of '\$30.00' and '\$ claiming' of '\$0.00'. A table lists the items: Mocha (1, \$10.00), Espresso (1, \$10.00), and Cafe latte (1, \$10.00). At the bottom, there are three buttons: 'CANCEL' (with a red 'X' icon), 'APPLY POINTS' (with a right arrow icon), and 'PAY' (with a checkmark icon). An orange arrow points from the text above to the 'CANCEL' button.

A non-registered customer receipt will include the additional text and/or QR Code information as setup in the installation Guide.

As in this example, if your company has opted to allow your customers to claim points at a later date, then your customer will need to either register via the Premium Web Portal or download the Mobile App (optional features).

Register New Member

The screenshot shows a mobile application interface for registering a new member. The form is titled 'Register New Member' and includes the following fields and options:

- Last Name:** Sample (highlighted with a red circle and a red arrow pointing to it)
- Phone:** 0414915456
- Email:** stickyfeet@iqgecko.com.au
- Send email:** A checkbox that is currently unchecked.
- Buttons:** A grey 'CANCEL' button with a red 'X' icon and a green 'CONTINUE' button with a white checkmark icon.

The interface also shows a keyboard at the bottom and a 'Current Transaction' amount of 30.00.

Enter customer data and press **CONTINUE**.

VERY IMPORTANT NOTE:

A. The customer will be able to log into the Registration Web Portal by using their last name (in this case "Sample") as their temporary password.

B. As passwords are case sensitive, the customer must spell their last name in the same Upper and Lower text format that it was registered in.

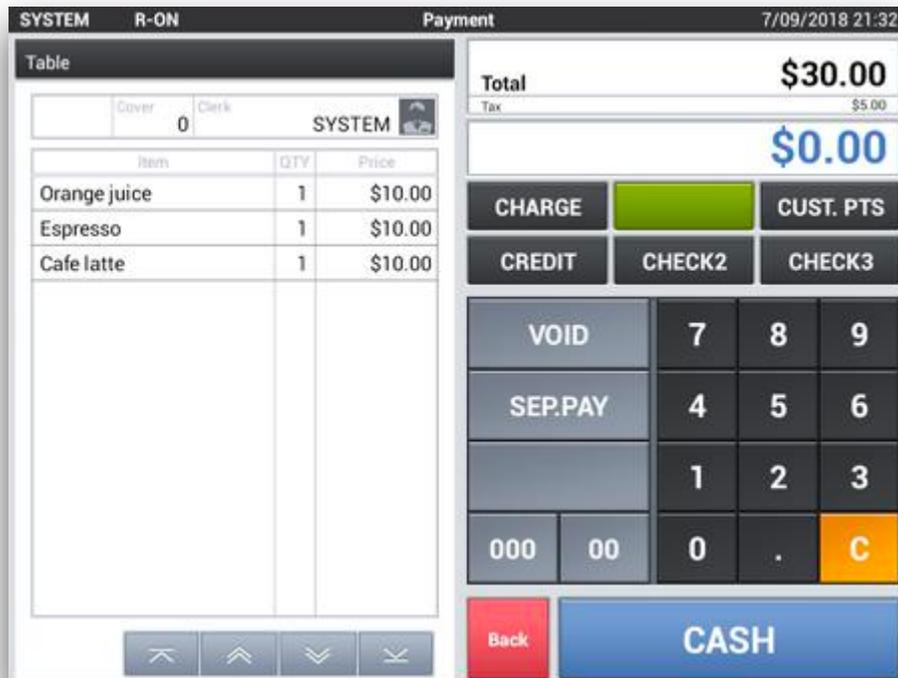

C. After logging in the first time using their **last name as their password**, the customer can simply update and save a new password.

note: passwords are "Case Sensitive" so if you spell the members last name with a Capital letter it will be required to be the same when entering they enter their password.

You may note that in this example the Points gave \$5 off of a larger purchase so \$25 are still owing. After you select PAY and when you are brought back to the Casio payment page you can take the remaining payments via cash or credit/debit card.

CASIO WORKFLOW.

- Loading Gift Card @ the POS -

Gift Cards have no value until loaded
@ the POS in real-time.

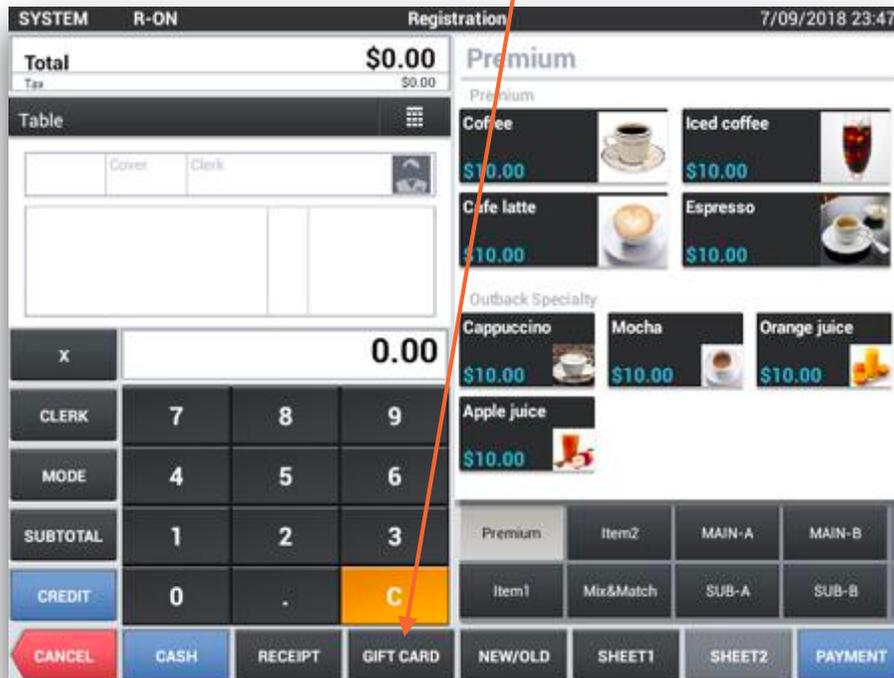

This is a “Closed-Loop” Gift Card solution which means:

1. These Gift Cards work exclusively with a specific merchant (or group of merchants) as set up in the StickyFeet ClientToolBox.
2. As the Gift Cards are exclusively transacted through the StickFeet platform, unlike a banking EFTPOS terminal, there is no charge to either load or redeem a Gift Card (0% merchant service fee).

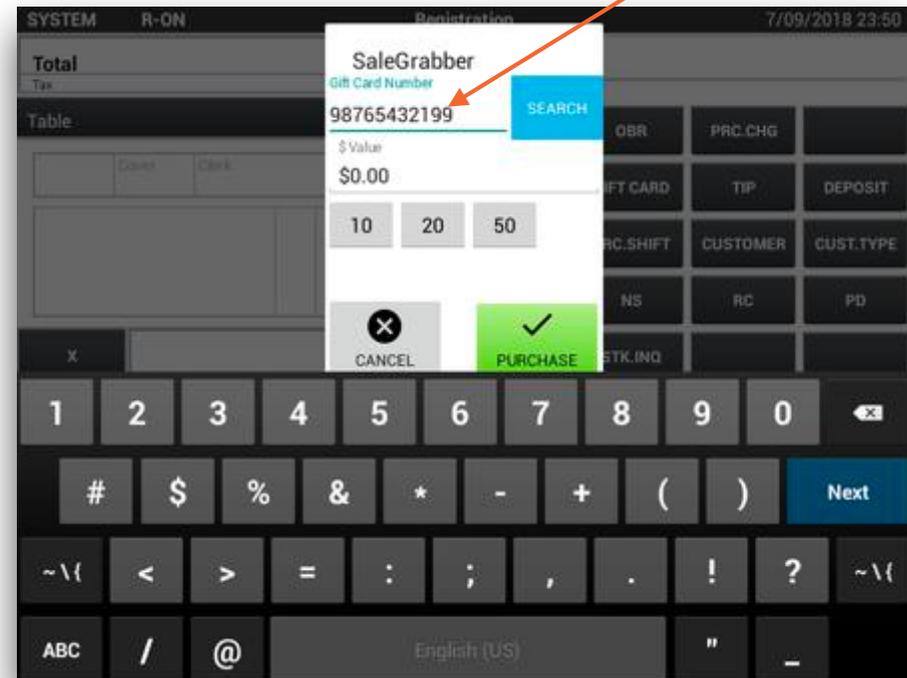

CASIO WORKFLOW.

- Redeeming Coupons @ the POS -

Although coupons are displayed on the POS, they do not run through the POS journal. All coupons are tracked on the merchant's loyalty campaign via the StickyFeet platform.

Redeeming Coupons @ the POS is only available with a purchase.

A coupon can be a "Free Piece of Birthday Cake with a Coffee", "A Complimentary Coffee Mug" or even "Tickets to an Event".

Coupons items are anything that the merchants wants to give.

Coupons @ the POS are only redeemable with a purchase.

Every coupon has a 1¢ value.

ADDITIONAL FEATURE.

- LoyaltyPad -

included
feature

LoyaltyPad allows web-based transaction access to the same data that is on the Casio POS.

Perfect for those times when mobility is required (ie: beverage delivery on the golf course, etc).

Although all transaction via LoyaltyPad are tracked through the same StickyFeet platform that the Casio POS is connected to, they are not connected to SaleGrabber and therefore are not journaled in the Casio POS.

ADDITIONAL FEATURE.

- Premium Portal -

optional
feature

Engage your customers from the first page and make them want to give you even more information with an enticing registration page - but not the big price tag.

With cutting edge features and easily editable images and text, you can save thousands of ongoing web developer costs as you can simply log in and change your text and images on the fly.

The Premium Portal is required for merchants wanting to allow their customers to claim points via QR-Code and Reference Number.

ADDITIONAL FEATURE.

- Mobile Apps -

optional
feature

A Loyalty, GiftCard and/or Payment App for both Apple (iOS) and Google (Android) is a simple and effective way to mobilise your company and engage with your customers anytime & anywhere.

Gamification digitally strategies such as perks and exclusive deals give brands a more engaging relationship with customers.

It places Your Brand on up to 19.4 million Australian mobile phones.

IQ Gecko brings those customers physically into your store.

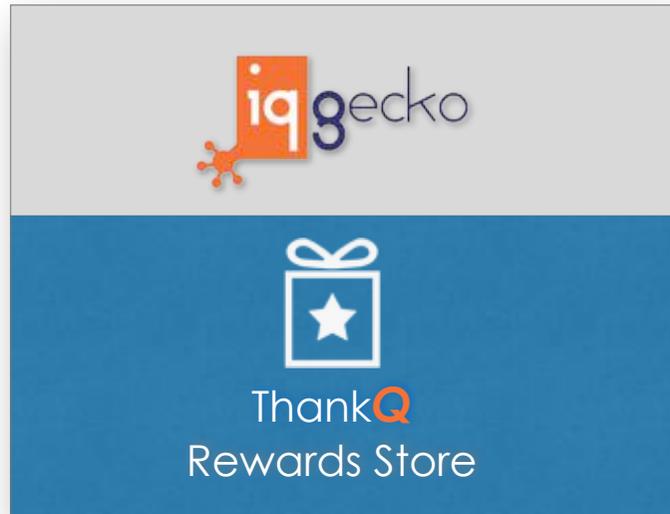

Converting a digital engagement into a physical in-store visit and purchase.

Brands such as Nike, McDonalds, Starbucks, DBS Bank and Zizzi Italian Restaurants have all adopted gamification digital marketing with great success.

ADDITIONAL FEATURE.

- ThankQ RewardStore -

optional
feature

Give your clients very generous points redemption value while saving you money. In fact, the cost incurred by your company for each \$100 worth of points given may be as little as only \$60.

Because the points are securely held in-house your company will not have any costs for giving points.

Only when the points are redeemed for goods will there be any cost incurred. And even when the points are redeemed the purchase costs are discounted to your company

The 3rd-party products are made available to your customers while the “thanks” along with the Rewards Store discounts and savings go to your company.

ADDITIONAL FEATURE.

- Digital Signage -

optional
feature

Digital Signage allows for the replacement of posters with the added advantage of almost immediate customer-facing digital marketing.

With image and video uploads as easy as "drag-and-drop" your new Digital Signage solution gives you complete image control at every location.

If you can imagine a seamless step-by-step transaction work-flow then you have just imagined the sleek simplicity that is IQ Gecko Digital Signage.

ADDITIONAL FEATURE.

- IQ Genius -

optional
feature

The IQ Genius module gives you the freedom to *Automagically* market to your customers in the most pro-active way.

Automated experiences that engage the consumer journey are proven to drive increased activity and transactions.

Every campaign is set to automatically “trigger” based on preset business rules which means that customers are automagically receiving the right communications at the right time.

MILLIONS* OF LOYAL CUSTOMERS
(OK! MAYBE NOT MILLIONS, BUT LOTS AND LOTS)
