

# Data Privacy Security

# Your Info = Secure

## Let's Be Serious

Your Data Safety & Integrity is  
*"The Most Important Thing"*

SIMON JOHNSON®

We take Security and Privacy very seriously and have technical encryptions, multiple server solutions and backups in place. We have worked with companies like Best Western Hotels, Harley-Davidson, Toys"R"Us and Suncorp Bank for many reasons - including our exceptionally cloud data security.

One of the benefits of using the StickyFeet platform from IQ Gecko is that since the data is kept on our computers, you don't need to worry about viruses, computer crashes, or making sure the latest upgrades are installed on your own equipment.

KOGARAH  
GOLF CLUB

# Your Info = Secure

**Once Logged In**  
You are accessing the  
very latest technologies.

Multiple dedicated Amazon Web Services (AWS) servers.

No shared "slices" in crowded devices.

Firewall for top-line security.

Load balancer that ensures there's always a server available.

Instant replication of data across all servers so it doesn't matter which server you hit. *And an added benefit of instant replication is that everything is always immediately backed up. So how's that for extra security?*

Our code base is kept in digital escrow at Iron Mountain (yes, THE Iron Mountain).

# Your Info = Secure

## Server Data

Safe from Physical  
and Digital attacks.

*Every precaution is taken to ensure that your data is safe and access to our servers is uninterrupted.*

*To that end, our servers are housed in a top tier secure data centre with:*

24-hour surveillance and restricted access.

256bit High Grade Encryption.

Multi-Homed redundant backbone fiberoptic connections for fast response and data transfer.

Multiple backup UPS and diesel generator.

CISP Compliance means you can rest assured knowing that we're meeting the industry's highest standards of protection

Redundant HVAC and early detection fire suppression system.

*With this kind of oversight of your data, you can sleep well at night. And hey, we've got a Privacy Policy too!*
